Abstract- A brief abstract is required. The maximum length of the abstract is not more than 150 words. The abstract should precisely describe the objective of the study, important findings and the most important conclusions. Any references or abbreviations should be avoided.

Keywords— (keywords should be between 5 to 7, and arranged in alphabetical order) MBBR; composite wastewater; mathematical modeling; monads' kinetic; process design.

I. INTRODUCTION

Origin and Relevance of the topic related to the conference theme. A very brief historical background with important milestones has been achieved so far, avoiding any comprehensive literature review or a summary of the previous published results. State the objective of the study.

II. MATERIALS & METHODS

Provide a detailed description of reagents, materials used, glassware, analytical procedure, detail schematic diagram of a experimental setup and a standard protocol for executing any experimental study. Methods has already been published in any literatures/books should be properly cited in the relevant section by a reference.
